Story

Domenic

Anna

Understanding Labour Pain

- ↓ blood supply to the uterus
- Stretching of the cervix and lower uterus.
- Pressure and pulling on pelvic structures.
- Distension of vagina and perineum during the second stage of labour.
- Prolonged use of the uterine muscle from contractions.

The Importance of Labour Pain

Purposeful
Anticipated
Intermittent
Normal

Pain vs. Suffering

Pain is an unpleasant physical sensation.

Suffering is the emotional reaction to that physical sensation which may lead to trauma.

Gate Control Theory

“The balance between painful and non-painful stimuli that reach your consciousness determines your perception of pain and it’s severity”. (Simkin).

Your Labour Support Team

Support during labour may help you:

- Cope better with labour pain.
- Use pain medications less often.
- Need less medical interventions.
- Have a shorter labour.
- See labour and birth as a positive experience.

Labour support bag

Breathing Patterns

Slow Breathing

- Breathe slowly and rhythmically in through the nose and out through the mouth.

Fun with Ice

Light (shallow) Breathing

- Inhale and exhale lightly through your mouth, making a sound on exhalation.

Variable breathing

- Shallow breathing for two to four breaths and then, after one inhalation, exhale slowly allowing your body to go limp.

Pushing

Event Training Schedule

- Establish a timetable
- Vary your training
- Prepare your mind for the race
- Pace yourself
- Take care of yourself
- Have your stuff ready
- Enjoy yourself

Informed choice

- Do what makes you feel comfortable during labour.
- Ask questions to help you make informed choices.
- Consider writing out your birth preferences to share with your health care provider.
- Consider using a code word to signal you want pain medication.
